Program

The combination of lectures and practical sessions will revise relevant surgical anatomy to enable delegates to undertake with confidence the surgical management of common joint disorders. Talks for each of the surgical procedures will be included as well as talks on arthritis. The course will cover for each procedure step by step approach from clinical localization, surgical approaches and surgical treatment practiced in our wet lab.

Basic principles in orthopedics / lectures and practical:

- 1) Orthopedic examination
- 2) Preparation of the surgeon
- 3) Preparation of the patient

Practical sessions and wet lab:

- Arthrocentesis of multiple joints
- SHOULDER - surgery for shoulder osteochondrosis – shoulder OCD
- ELBOW - elbow mcd - coronoidectomy – subtotal coronoid ostectomy
- STIFLE – lateral retinacular suture placement for the cruciate deficient stifle, lateral approach to the stifle and fabello – tibial suture
- PATELLA – techniques to correct medial patellar luxation (recession sulcoplasty and tibial tuberosity transportation)
- HIP – femoral head and neck excision
